Testing and maintenance

01 / EXPERIENCE

BetterFlow

FLAGSHIP PRODUCT

End-to-end product design and development

- Built the product end to end across product direction, UX, public booking, business dashboard, mobile apps, backend, and release delivery.
- Connected scheduling, customer records, visual estimates, invoices, notifications, and Stripe payments into one workflow for service businesses.
- Shipped customer-facing booking, invoice, and payment experiences alongside the tools owners use to run daily work.

StockMarketGuides

ONGOING ENGAGEMENT

Full-stack product development

- Redesigned and rebuilt parts of a production SaaS dashboard for stock research and trading workflows.
- Delivered dense tables, filters, score displays, and subscription-aware flows inside a mature codebase.
- Maintain and extend the product without disrupting existing customers.

KibbeAI

SELECTED ENGAGEMENT

Frontend development and product input

- Built responsive product discovery around natural-language fashion search, keeping AI guidance useful without taking over browsing.

02 / SELECTED PRODUCT

Owwed

[owwed.builtby.vin](#)

Creator, product designer and mobile developer

Designed and built a local-first iOS and Android app for tracking money owed between people, including partial payments, reminders, and clear history.
